Rehabilitation Centre

Norridge HealthCare and Rehabilitation

Board Certified Physical Medicine and Rehabilitation Doctors

The unique collaboration between the physiatrist, therapists and patient brings a focused and comprehensive approach to physical recovery at Norridge. Focusing on both the medical as well as physical aspects, the rehabilitation physician coordinates care with each patient's primary care doctor.

Doctors of Physical Medicine and Rehabilitation help patients maximize their rehabilitation potential.

Subacute Rehabilitation Services

Norridge features services, which distinguish them from the competition, these services include:

weekly physician-lead rehabilitation conferences.

on-site physician visits 2-3 times a week.

an individualized treatment plan-which includes a home assessment-helping each patient transition to home safely.

contemporary and newly remodeled patient rooms with a spacious lounge-great for family gatherings.

dedicated unit for short-stay patients.

aggressive discharge planning.

therapists certified in the latest rehabilitative treatments.

Rehabilitation Therapists

Norridge's therapy team consists of physical, occupational and speech-language therapists who are trained in the latest rehabilitation methods and are certified in Kinesiotaping, Lymphedema treatment wound care, E-Stim and Ultrasound treatment. Specific areas of expertise include orthopedic and neurological rehabilitation as well as general deconditioning as a result of hospitalization.

Skilled rehabilitation therapists are trained in the most current treatments and techniques.
